Generators with additional capacity

Golf courses & hotels nearby

Hair salon

Post office

Large, efficient floor plates

BUSINESS CONTINUITY/ DISASTER RECOVERY ADVANTAGES

Blue Hill Plaza is unique in its ability to provide a safe and secure environment to satisfy internal business and external regulatory requirements for business continuity and/or disaster recovery needs. Originally designed as a corporate mission critical data center facility, it was designed to meet the core requirements of being both continuously available and concurrently maintainable.

LOCATION

Area is located in neither a seismic or flood zone, powered by a separate section of the NYISO grid than New York City.

ELECTRICAL

Designed to data center standards as a high-reliability facility, there are redundant utility feeds and distribution systems in the complex.

GENERATOR SYSTEM

Built to data center standards and has sufficient capacity to accommodate any tenant requirement. The system is multi-engine with redundancy, has dual-path distribution and is capable of working in parallel with the local utility.

TENANT CONNECTIONS

Sufficient connectivity for both electrical and HVAC systems. This allows for economic and prompt provision of service.

TELECOMMUNICATIONS AND NETWORK

Carrier-neutral communications capability. Two independent phone rooms with diverse routing into the complex to accommodate all major providers in the area. There are two independent vaults servicing Blue Hill Plaza, each fed from different nodes off the fiber lines that feed the facility. Verizon has historically been the main carrier into the complex.

MANAGED SERVICES

Blue Hill Plaza can provide tenant-specific managed services for facilities and systems complimenting and strengthening a tenant's internal resources.

POWER DENSITY

Over eight Megawatts of critical facility infrastructure available to tenants.

INDEPENDENT HVAC

Availability to install completely independent high-reliability HVAC systems. The glycol system has multi-path distribution, redundant components and sufficient capacity.

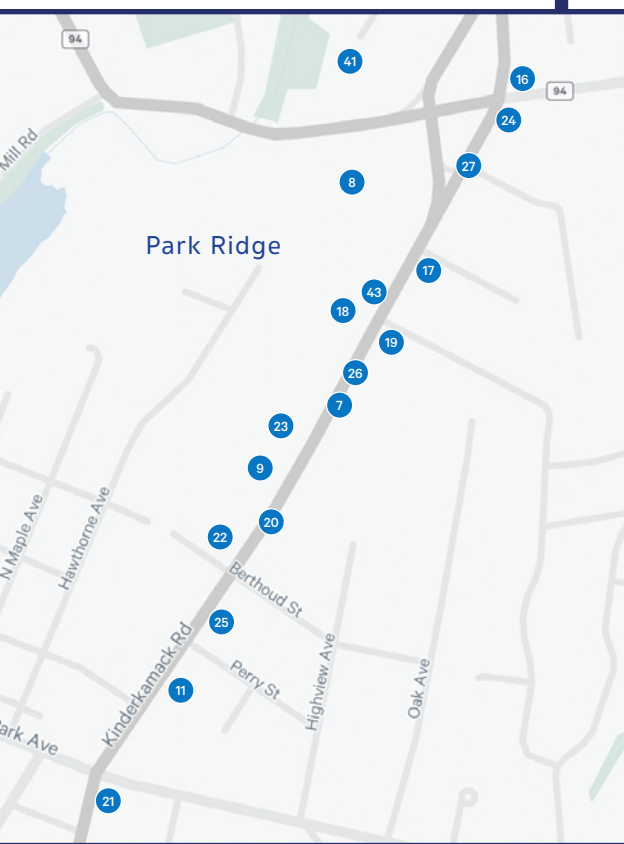

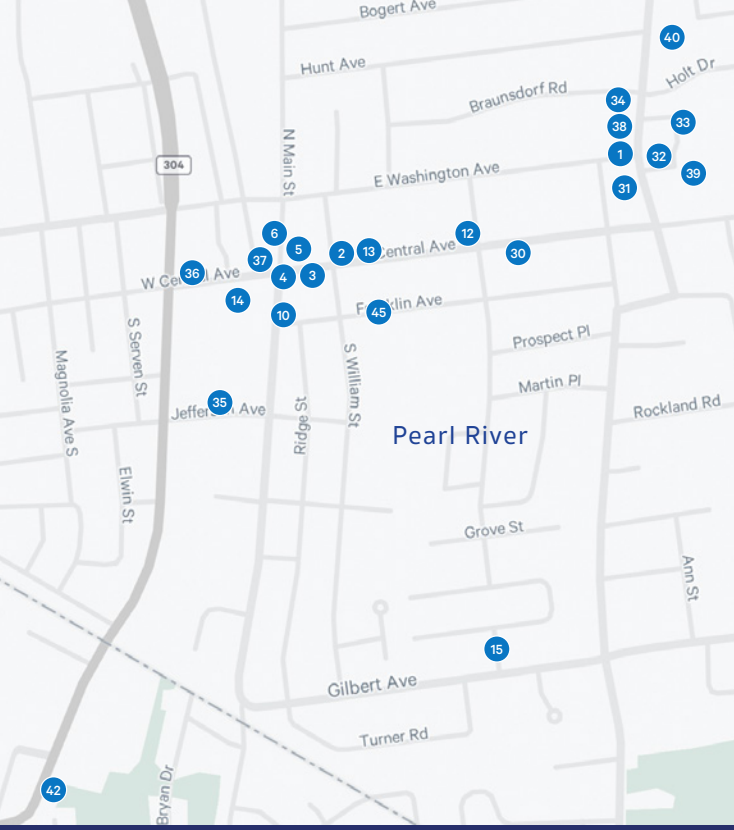

FIRE PROTECTION

The entire Blue Hill Plaza facility has fire sprinklers. Independent fire detection can be set up as nodes to the building master system if desired.

INFRASTRUCTURE AS A SERVICE

Blue Hill Plaza currently provides a number of tenants with generator, glycol and UPS infrastructure as a service. This frees the tenants from the obligations of maintaining and servicing the equipment involved with these services. Pricing for these services is done using a utility model with a fixed charge for connections, reserved capacity and a variable charge for actual use.

LOCAL AREA AMENITIES

1. No. 1 Sushi
2. Dean's Coffee Co.
3. T.F. Noonan's
4. Russo's
5. Chase Bank
